To Whom It May Concern:

As Owner's Representative and principle designer of the Michigan Area United Methodist Church Ministry Center in North Lansing Michigan I was particularly interested in finding a contractor who was personable, competent, accessible and responsive. Fielek Construction Services, LLC was one of four contractors I interviewed. I was especially impressed with their cooperative spirit and attitude of flexibility as well as approaching this project in a spirit of partnership.

This project was to renovate and build out a 7,700 square foot commercial office and meeting center. As always, but particularly with faith based organizations, budget management to outcomes was a constant aspect of this project. Matt and Julie worked hard to help us identify those potential 'budget busting' elements and made affordable alternatives available to us (both vendors and product) while enhancing the overall appearance of the space and not endangering the schedule.

This project came with a very time sensitive element - transitioning from leased space. Our construction start was delayed more than a month by plan reviewer availability and a couple of detailed architectural resolutions which had to be negotiated. Fielek was able to make up nearly all this time through tighter coordination of the trades, regular on-site management and ongoing conversations with the DeWitt Charter Township Building Department and its inspectors.

The project was completed in fine form and after occupancy of six months my client still feels their vision for the space had been realized. It was a success due in large measure to Fielek's construction management skills, industry experience and flexibility. I have appreciated and enjoyed working with Matt and Julie. I heartily recommend them as an excellent general contractor worthy of your serious consideration.

Sincerely,
